Why use LambdaTest?

The fastest and most reliable test execution and orchestration platform.

Test Intelligently. Ship Faster.

Problems LambdaTest aims to solve

○ Developers and testers (QA) need a robust test execution platform that is reliable, secure, scalable, fast, and affordable.

○ Enterprises are craving innovation that can do the heavy-lifting for them by orchestrating tests and bringing in the right intelligence so as to enable quicker time to market.

Our Product Suite

○ **LambdaTest test execution platform** - Contains manual testing, automation testing (Selenium, Cypress, Playwright, Puppeteer), native app testing, real devices cloud, visual regression testing, and on-prem solutions.

○ **HyperExecute** - An IP-led next-gen smart test orchestration platform that helps testers and developers run end-to-end automation tests at the fastest speed possible, thereby enabling them to achieve quicker time-to-market.

○ **Test-at-Scale (TAS)** - An IP-led test intelligence and observation platform that helps development teams shift left their testing thereby shortening testing durations & deliveing faster.

500+	**1M+**	**130+**
enterprises	users	countries

rely on LambdaTest for their test execution and orchestration needs.

Why use LambdaTest

○ Almost zero flakiness

○ SOC2 Type 2-certified platform that is GDPR Compliant and CCPA Compliant

○ Comes with parallel testing, using which users can easily scale the number of sessions up or down based on fluid requirements

○ The fastest test execution platform in the market

○ The most competitive pricing in the market

○ 120+ integrations ensuring that it fits seamlessly into the user's environment

○ Best customer support in the industry with an average response time of 1 min 40 seconds

Letting the Numbers do the talking

We've run more than 100 million tests since our inception & Customers were able to:

Achieve a **95%** quicker time-to-market,

Increase their release productivity by **62%**

Identify **67%** of issues prior to launch.
